# Team Series

Maxim van Helvoort

The thought process behind designing my feature was to have it available for intermediate, advanced and pro riders. It had to be designed so that it could be used for riding in both ways, hence both full size and 2.0 would work. It also adds hack possibilities and I did not want it to be too big.

My favourite features are rail-to-rails, banks and gaps, so I tried to design something that includes all those features for a good price.
